TREATMENT GLOSSARY

TOX & FILLER

The use of neuromodulators can help reduce or soften fine lines and wrinkles on your forehead, around the eyes (crows feet), glabella (between the eyes), wrinkles on the nose, and so much more. Well placed filler can address issues like thin or asymmetrical lips, hollowing under the eyes, fullness in the cheeks and mid-face, recessed chin, and other areas of concern. Schedule your consult first so we have lots of time to plan.

BBL/MOXI

BBL Hero is the fastest way to treat redness, sun damage and troublesome age spots across your whole body! Add MOXI to lighten, brighten and refresh your complexion! MOXI can correct pigmentation issues, revitalize your skin, and improve tone and texture. Treatments are done in a series of three, so depending on your timeline get started now.

LASER HAIR REMOVAL

Make sure your wedding day doesn't include razor bumps and ingrown hairs! Laser Hair Removal is a fast, painless way to save yourself time on your special day (and beyond!). Typically completed in 4-6 treatments, you'll want to get started on this asap.
