

# STAY GLOWING DURING PREGNANCY

You've officially entered your "omg you're glowing!" era, let's make sure your skin stays that way all nine months!

## Dermaplaning

No, it's not just shaving. Dermaplaning is non-invasive, and minimizes the appearance of fine lines, dry, patchy skin and reduces facial hair and dead skin cells making your skin visibly smoother and brighter. Improves absorption of products!

## Dermalinfusion

This MidState fav is a three-in-one treatment that exfoliates, extracts and infuses anti-aging (pregnancy safe) peptides into the skin. You'll see immediate results, and leave with hydrated, glowing skin.

## Enzyme Treatment

An enzyme treatment is a non-abrasive skin therapy from naturally derived ingredients that helps to refresh the skin for a more youthful appearance. You can treat acne, rosacea and more.

## Mom-to-be Facial

A twist on our European Facial, this treatment will leave you feeling like the queen you are. Complete with hot towels, gentle facial massage and pregnancy safe products, you'll want one every month!
